DIGITAL POWER DISTRIBUTION MAKES FOR THE FUTURE

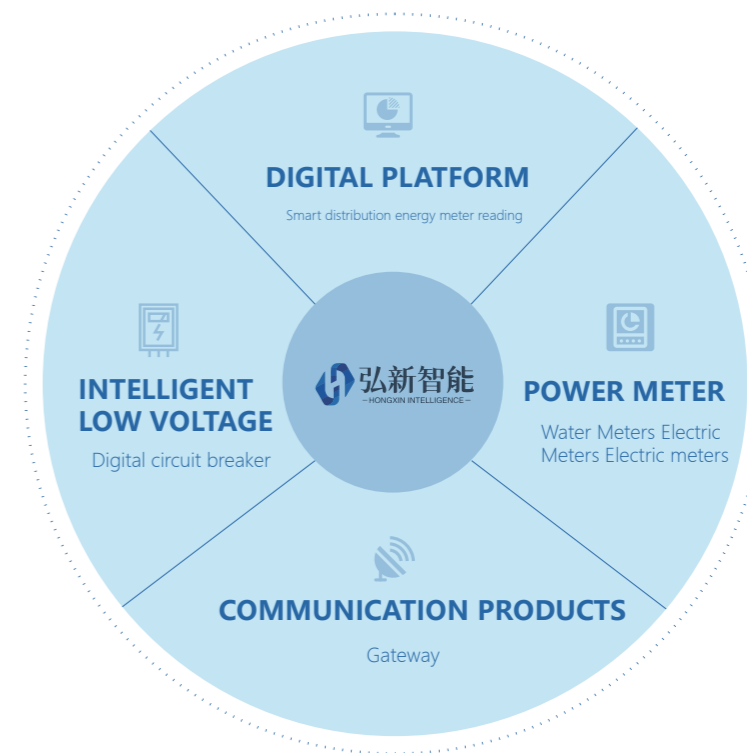

Digital distribution helps with energy transformation and low-carbon emission reduction

Xiamen Hongxin Intelligent Technology Co., Ltd. is a provider of innovative digital distribution solutions, integrating system development, management, operation and maintenance of management platforms, as well as research and development, manufacturing, and sales of intelligent sensing terminal products. Based on over 20 years of accumulated experience in product research and development, manufacturing, and engineering in the power industry, Hongxin Intelligent has developed a series of intelligent distribution product matrices, including Hongxin Smart Distribution and Energy Carbon Cloud Platform, Intelligent Circuit Breaker Series, Intelligent Instruments, and Intelligent Gateway.

The company adheres to the concept of "innovation as the wing, altruism as the heart, and jointly building a safe, green, and intelligent electricity ecology", and the mission of "protecting electricity safety with innovative technology and empowering industrial symbiosis with altruism". It is committed to providing customers with a safer, more reliable, more efficient, and lower carbon electricity experience.

MAIN BUSINESS

CORPORATE CULTURE

CORE CONCEPT

Innovation as the wing, altruism as the heart, jointly building a safe, green, intelligent electricity ecosystem

CORPORATE MISSION

Protecting electricity safety with innovative technology and empowering industrial symbiosis with a selfless heart

CORPORATE VISION

To become a leader in innovation in the field of smart power distribution, and to build a safe, green win-win smart electricity ecosystem

CORE VALUES

Innovation driven, altruistic symbiosis, safety based, green responsibility
